

Letter to editors from

T. Banakh and A. Plichko

Corollary 2 of our paper *The algebraic dimension of linear metric spaces and Baire properties of their hyperspaces*. Rev. R. Acad. Cien. Serie A. Mat. 100 (2006), 31-37 was known. It follows from Proposition VIII.2.2 in the book [C. Bessaga and A. Pełczyński, *Selected topics in infinite-dimensional topology*, Monografie Matematyczne, Warszawa, 1975]. We thank Z. Lipecki who call our attention to this theorem. Let us note that our topological approach to this fact allows to obtain new results on Baire hyperspaces.
